

THUREIN TUN

Contact: WhatsApp: +66 0917604142
Email: thureintunojt@d3-sg.com

Nationality – Burmese

Date of birth – 5th January, 2001

Profile

A junior full-stack developer with 1 year of hands-on experience in web and backend development. Skilled in building secure, user-friendly systems using modern technologies like Supabase and FastAPI. Passionate in continuous learning, solving real-world problems, and contributing to teams with dedication.

Previous Experiences:

• D3-SG Pte Ltd

Jan, 2025 - Present

Confidential Full-Stack Application (Supabase-Based) ongoing

Role: Full-Stack Developer / Security & UI/UX

Full-stack development using Supabase (auth, database, realtime, storage)

Identified and remediated vulnerabilities from penetration testing

Strengthened user wallet security (e.g. transaction signing, rate limiting, input validation)

Implemented UI/UX fixes, polished frontend flows, improved accessibility and user feedback

Jarvis AI (Proof of Concept)

Role: Backend Developer

Designed and built backend data storage systems for AI workflow processing.

Developed the Admin Module and implemented authorization logic using FastAPI.

Integrated secure backend data flow for AI interactions and task management.

Used FastAPI, SQLAlchemy, PostgreSQL, Redis, and JWT-based role authorization.

Case Management App (PowerApps & Power Automate)

Role : Intern Dev

a Case Management App similar to D365 Case Management, integrating ChatGPT in a Canvas App for instant case resolution
Embedded the solution into a Model-Driven App and connected with Power Automate for real-time notifications, improving response efficiency
Implemented Service Level Agreements (SLAs) to ensure timely case resolution and improved compliance

Projects

μStream: MuStream

Bachelor's Final Year Project
Duration: 3 months

- Developed a music streaming website with live chat and recommendation system
- Implemented user authentication, state management, and integrated Socket.io for live chat
- **Used:** TypeScript, React, Next.js, Redux, Pytorch, Flask, Express.js, and hosted on AWS, EC2

Weather Forecasting Model

Bachelor's Degree Project
Duration: 1 month

- Preprocessed data and trained a Gradient Boosting model
- Achieved recall of 84.7%
- **Used:** Orange for machine learning

Database Data Fetching Algorithm

Bachelor's Degree Project
Duration: 1 month

- Created programs to fetch data using parallel and sequential computing
- Demonstrated improved performance with parallel programming as data volume increased
- **Used:** Python, PyCharm, multiprocessing, and MySQL-connector

Online DVD Store System

Bachelor's Degree Project
Duration: 2 months

- Developed fast and accurate search algorithms using Binary Search Tree and Doubly Linked List
- Achieved efficient searching with a balanced AVL Tree ($O(\log(n))$ time complexity)
- Implemented CRUD features and ensured data flow between data structures and the database
- **Used:** Python, PyCharm, and SQLite3

Baby Store Management System

HND Final Year Project
Duration: 2 months

- Designed a logistic database for baby items
- Developed a point-of-sale system with basic UI/UX design
- Implemented system using Java and PHP, integrated with MySQL database (Beginner level)

Acquired Documents

Bachelor Degree in Computer Science
Coventry University, United Kingdom (Nov 2022 – Jun 2024)
Campus: PSB Academy, Singapore

Diploma in Level 5 Higher National
Diploma in Computing
Pearson BTEC, Yangon, Burma (Jan 2020 – Sep 2021)
Campus: Youth International University, Burma

Certificate in HND Foundation – Computing
Youth International University, Yangon, Burma (Oct 2019 – Dec 2019)

Certificate in Matriculation Examination
Mingalar Education Centre, Yangon, Burma (June 2016 – Mar 2017)

E-learning (2025)

Squirro Engineer Certification
Squirro Frontend Developer Certification
Squirro No Code AI Model Creator Certification

Technical Skills

Programming Languages: Node.js, JavaScript, TypeScript, Python, Java, C++

Frameworks: React, Next.js, Redux

Technologies: Backend Development, Database Design and Integration, API Integration, User Authentication, Socket Integration

Other: Object-Oriented Programming, System Design, Data Structures and Algorithms, Machine Learning

Language Skills

Native : Burmese

Fluent : English
